

Amrita School of Engineering
19CSE301: Computer Networks Lab
PACKET TRACER

Instruction:

- Configure your network with the address specified in the question, otherwise it won't be evaluated.
- Upload your .pkt file in teams

Question: Design a network topology with three LAN segments connected to each other through their own Gateway routers, given the network address xx.0.0.0, where xx is the last two digits of your roll no.

- Add a web server in any one of the LAN segment and make it accessible by all pcs in other two LAN segments.
- Dynamically configure all network interfaces in any one of the LAN segments
